## ANALYSIS REQUESTED

**Types of samples:**

Lake hauls

Mesocosm experiments

**Data requested:**

Counts

Biomass included

**Total number of samples:** \_\_\_\_\_

**Type of preservative:** \_\_\_\_\_

**Final storage vials required:** 2 oz Boston Rounds (\$2.50 each)  
*(includes printed labels and parafilm)*

1 oz Boston Rounds (\$2.00 each)

Scintillation vials (\$1.00 each)

**Invoice delivery deadline:** \_\_\_\_\_

*For Cladocera (all life stages) and adult Copepoda, identifications are to the species level with the exception of the following genera: Acanthocyclops, Microcyclops, Alona, Camptocercus, Eurycercus, and Ceriodaphnia. For copepodids, Limnocalanus macrurus and Senecella calanoides are identified to species. Epischura copepodids are identified to the genus level. All other copepodids and all nauplii are identified to the order level (Cyclopoida or Calanoida). Harpacticoida are only identified as such.*

***\*My time is booked upwards of a year in advance of deadlines. To avoid disappointment, please contact me as soon as possible to secure your spot in my processing queue!***
